

iSocietyManager

Making your complex secure

Traditional/ Manual Way

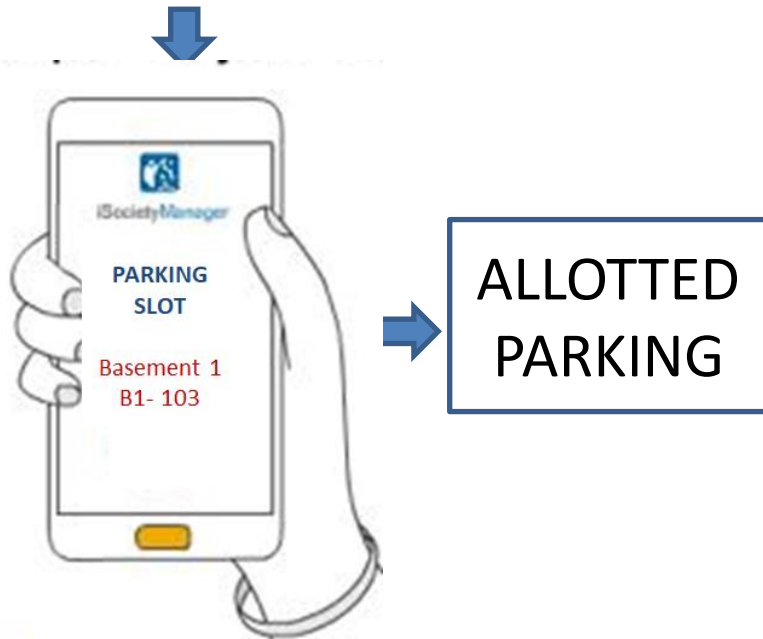

1. Entry and Exit is made note on paper in register - Time consuming process, risk of data loss, visitor exit is not captured most of the time.
2. No analysis can be done with these kind of records.
3. Resident can not generate Pre-Approved pass or Recurring pass.
4. In case of any mishap, retrieving the visitor details including photograph/ number is not possible.
5. Challenge in managing visitors across multiple locations/gates.
6. Visitor & Vehicle tracking is not possible, Visitor data & photo not visible to resident.
7. Resident response is not captured. Visitors allowed without permission.
8. No tracking of Maids/ Domestic Staff
9. Generating payroll on attendance basis is very tedious and error prone.
